# Pigmented inks for printing contrast, easy-to-read codes

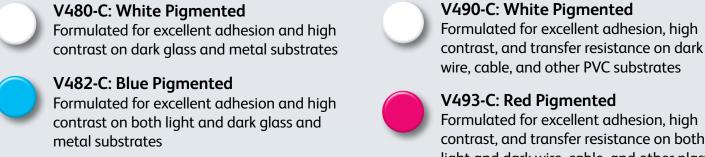

Pigmented inks provide contrast codes across a wide array of substrate colors. Using continuous inkjet printing with pigmented inks, you can:

- Print onto varying substrates and colors across multiple production runs
- Minimize the need for spare printers dedicated for different substrate colors

#### Videojet pigmented ink characteristics TEMPERATURE RESISTANT TRANSFER RESISTANT UV and FADE RESISTANT Pigmented inks are designed to Printed codes dry quickly to help Pigmented inks are formulated to withstand both pressure and prevent ink transfer to adjacent withstand the outdoors, maintain elevated temperatures products their original hues, and resist fading **HIGH CONTRAST HIGH ADHESION FAST DRY** Codes printed with pigmented With their quick dry time, many Pigmented inks adhere quickly inks on darker surfaces are visually pigmented inks are well-suited for and strongly to a wide variety of distinctive and easy to see high-speed production lines substrates

### Videojet hard-pigmented ink performance

metal substrates

contrast, and transfer resistance on both light and dark wire, cable, and other plastic substrates

V485-C: White Pigmented

Formulated for excellent adhesion, solvent

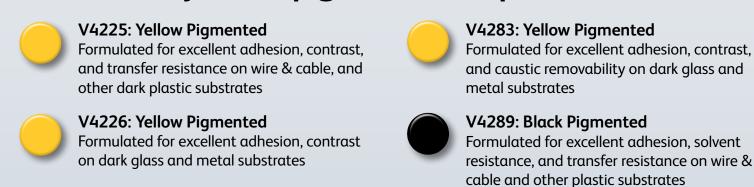

resistance, and high contrast on a wide variety of dark substrates

V494-C: White Pigmented
Formulated for excellent adhesion, high contrast, and transfer resistance on dark wire, cable, and other PE substrates

Formulated for excellent adhesion, high

contrast, and transfer resistance on light and dark wire, cable, and other plastic substrates

#### Videojet soft-pigmented ink performance

Videojet hard-pigmented inks on light and dark substrates

Videojet soft-pigmented inks on light and dark substrates

Videojet dye-based inks on light and dark substrates
