

## Dedicated support to cannabis original equipment manufacturers (OEMs) and integrators

Labeling requirements for cannabis products are strictly regulated and constantly evolving. Processors need to place a variety of information such as date codes, serial numbers, weight, and CBD/THC potency on small, varied packages.

**At Videojet, we have a dedicated cannabis OEM support program in place to help you equip your cannabis customer's packaging lines with coding solutions to help them meet their regulatory and branding objectives.**

### Supporting you and your end customers through every step

#### Evaluate Solutions

- Sales, engineering, and back-office teams dedicated to the OEM to assist in the specification of the best integrated solution and support. Dedicated and certified project management team available.
- Full suite of supporting collateral to help with your customer conversations.

#### Set-up and Installation

- Skilled OEM technical team that understands cannabis regulatory labeling requirements and intricacies of integration to ensure smooth installation.
- OEM Factory Acceptance Test (FAT), installation guides, documentation, and customer operator training available.

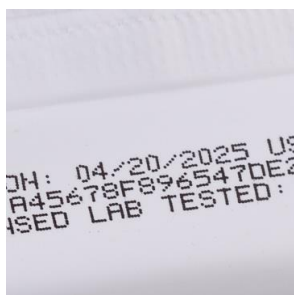

#### Post Sale Support

- Your end-customer's experience does not stop after the sale. We have the industry's largest service team dedicated to provide post-sale support.
- Follow up guidance on application and print quality optimization, plus expert advice for moving or setting up new lines and changing print messages.

# We are committed to support your cannabis customer's toughest challenges

High quality codes to help your customers meet their branding and regulatory needs
